ADDITIONAL SUPPLY CHAIN DATA

1. Coal Phase Out

Number of suppliers using coal in Tier 1 & 2 in 2025

Country	Number of Suppliers
Cambodia	1
China	10
Guatemala	1
India	6
Indonesia	4
Pakistan	3
Vietnam	5
Total	30

Current Progress through December 2025:

- 7 suppliers have already phased out coal by using alternative energy sources including natural gas, biomass and onsite solar energy. Since 2021, a total of 23 facilities have successfully completed the phase-out of coal.
- 8 suppliers have started phasing out coal by using alternative fuels. They are trying to use less % of coal for onsite steam generation.
- 15 suppliers are still working on phase out plans and looking for alternative fuels available in their market

Barriers for coal phase-out:

- Unavailability / unstable supply of alternative energy (e.g. natural gas, biomass)
- Investment required for new boilers
- Lack of space for new boilers and related equipment
- Cost increase due to fuel switch and maintenance cost

VERIFICATION OPINION DECLARATION GREENHOUSE GAS EMISSIONS

To: The Stakeholders of American Eagle Outfitters, Inc.:

Apex Companies, LLC (Apex) was engaged to conduct an independent verification of the greenhouse gas (GHG) emissions reported by American Eagle Outfitters, Inc. (AEO) for the period stated below. This verification declaration applies to the related information included within the scope of work described below.

The determination of the GHG emissions is the sole responsibility of AEO. AEO is responsible for the preparation and fair presentation of the GHG emissions statement in accordance with the criteria. Apex's sole responsibility was to provide independent verification on the accuracy of the GHG emissions reported and on the underlying systems and processes used to collect, analyze and review the information. Apex is responsible for expressing an opinion on the GHG emissions statement based on the verification. Verification activities applied in a limited level of assurance verification are less extensive in nature, timing, and extent than in a reasonable level of assurance verification.

Boundaries of the reporting company GHG emissions covered by the verification:

- Operational Control
- Worldwide

Type of GHGs: CO₂, N₂O, CH₄, HFCs

GHG Emissions Statement:

- **Scope 1:** 9,878 metric tons of CO₂ equivalent
- **Scope 2 (Location-Based):** 53,787 metric tons of CO₂ equivalent
- **Scope 2 (Market-Based):** 41,630 metric tons of CO₂ equivalent
- **Scope 3** Use of Sold Products: 2,510,531 metric tons of CO₂ equivalent

Data and information supporting the Scope 1 and Scope 2 GHG emissions statement were in most cases historical in nature, but in some cases estimated.

Data and information supporting the Scope 3 GHG emissions statement were in most cases estimated rather than historical in nature.

Global Warming Potential (GWP) and emission factor data sets:

- GWP: Intergovernmental Panel on Climate Change (IPCC) Sixth Assessment Report (AR-6)
- United States Environmental Protection Agency (USEPA) Emission Factor Hub, 2025
- Cornerstone Emissions & Generation Resource Integrated Database (eGRID), 2024 (March 2026 release)
- Environment Canada, National Inventory Report 1990-2023: Greenhouse Gas Sources and Sinks in Canada, Annex 13, released 2025

Period covered by GHG emissions verification:

- February 1, 2025 to January 31, 2026

Criteria against which verification was conducted:

- World Resources Institute (WRI)/World Business Council for Sustainable Development (WBCSD) GHG Protocol Corporate Accounting and Reporting Standard (Scope 1 and 2)
- WRI/WBCSD GHG Protocol Corporate Value Chain Accounting and Reporting Standard (Scope 3)

Reference Standard:

- ISO 14064-3 Second edition 2019-04: Greenhouse gases -- Part 3: Specification with guidance for the verification and validation of greenhouse gas statements

Level of Assurance and Qualifications:

- Limited
- This verification used a materiality threshold of ±5% for aggregate errors in sampled data for each of the above indicators.

GHG Emissions Verification Methodology:

Evidence-gathering procedures included but were not limited to:

- Interviews with relevant personnel of AEO;
- Review of documentary evidence produced by AEO;
- Review of AEO data and information systems and methodology for collection, aggregation, analysis and review of information used to determine GHG emissions; and,
- Audit of sample of data used by AEO to determine GHG emissions.

Verification Opinion:

Based on the process and procedures conducted, there is no evidence that the GHG emissions statement shown above:

- is not materially correct and is not a fair representation of the GHG emissions data and information; and
- has not been prepared in accordance with the WRI/WBCSD GHG Protocol Corporate Accounting and Reporting Standard (Scope 1 and 2), and WRI/WBCSD Greenhouse Gas Protocol Corporate Value Chain Accounting and Reporting Standard (Scope 3).

It is our opinion that AEO has established appropriate systems for the collection, aggregation and analysis of quantitative data for determination of these GHG emissions for the stated period and boundaries.

Statement of independence, impartiality and competence

Apex is an independent professional services company that specializes in Health, Safety, Social and Environmental management services including assurance with over 30 years history in providing these services. No member of the verification team has a business relationship with AEO, its Directors or Managers beyond that required of this assignment. We conducted this verification independently and to our knowledge there has been no conflict of interest. Apex has implemented a Code of Ethics across the business to maintain high ethical standards among staff in their day-to-day business activities. The verification team has extensive experience in conducting assurance over environmental, social, ethical and health and safety information, systems and processes, has over 20 years combined experience in this field and an excellent understanding of Apex's standard methodology for the verification of greenhouse gas emissions data.
